

Interior of Sanctuary After Remodel

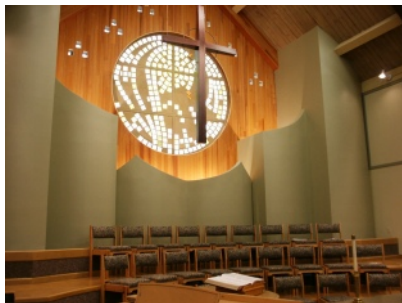

With the remodel of this mid century modern sanctuary we provided openness, flexibility, and an updated appearance. The design reinforces and expands upon the circular design of the faceted glass window behind the chancel

BPH was later asked to help with the remodel of the existing fellowship hall. We were able to work with the church and the interior designer to create a clean contemporary environment. We also incorporate the same circle stained glass motif as artwork in the center of the floor.
