Gathering Space and Coffee Shop

Great Room

This is the second phase we have done for St. Luke's. It includes a 2 story 14,400 SF in addition and a new accessible covered drop-off. The main floor of the addition consists of a generous lobby gathering space and conference center style Great Room seating 280. This room can be divided up into 3 classroom spaces with operable walls. The lower floor includes a new licensed daycare with 5 classrooms and a central activity room.

As part of this phase, we also came up with a new color concept for the whole campus and the church repainted all of the existing buildings.
