Multipurpose Lobby Interior

Exterior Photo of Main Entry

BPH Architects helped Harbor Covenant Church develop a long range site plan for their new property. The first phase was a 350 seat sanctuary, completed in 1983. We later designed a 2 story classroom wing which was finished in 1992. Now, 20 years later, Harbor Covenant has completed a key step in the long range plan by adding a new multipurpose lobby that ties all 3 phases together under one roof.

The most recent project is about 7000 SF and includes warm and inviting lobby space with a fireplace, a large kitchen, a fenced-in play area, and a new covered entry and drop-off. As part of this phase, the church painted the entire facility, new and old, to give it a unified and updated appearance.
